SUMMARY

Computer Science graduate with hands-on experience across UI/UX, digital marketing, marketing analytics, responsive web development, and digital experiences. Experienced in creating responsive interfaces, dashboard experiences, website solutions, SEO workflows, and marketing analytics dashboards. Interested in building user-focused digital products that combine design, technology, data, and business objectives.

EXPERIENCE

Digital Marketing Intern — Noodhan Technology 2026

- Worked across website optimization, SEO, content, and digital marketing workflows.
- Supported website improvements and search visibility using Google Search Console and related tools.
- Contributed to client-facing websites and digital marketing experiences.

PROJECTS

Explain My Banking — Banking UX & Financial Explainability Platform

React · TypeScript · Tailwind CSS · AI-Assisted UX

- Designed and developed a banking UX prototype that explains month-over-month spending changes using transaction data and category-level insights.
- Built interactive financial dashboards with spending comparisons, transaction evidence, and explainable insights.
- Focused on improving financial transparency, accessibility, and user understanding through clear interface design.

OpsPilot — AI-Powered Banking Problem-Solving Assistant

React · TypeScript · Tailwind CSS · Node.js · Express · xAI Grok API

- Designed and developed an AI-assisted banking support prototype to help users investigate transaction issues and understand appropriate next steps.
- Integrated frontend and backend components with AI-assisted responses and rules-based fallback handling.
- Implemented evidence-oriented explanations, server-side validation, and confirmation flows for simulated consequential actions.

Marketing Analytics Dashboard

Google Analytics 4 • Looker Studio

- Created an interactive dashboard for website traffic, user behavior, engagement, and conversions.
- Developed KPI views across Organic, Direct, Referral, Social, and Paid Traffic.

WordPress Business Website Development

WordPress • Elementor • Rank Math WPForms

- Developed a responsive business website with structured navigation and content hierarchy.
- Implemented SEO infrastructure and lead-capture workflows.

SEO Optimization & Website Audit

Google Search Console • Google Analytics 4 • WordPress

- Optimized 15+ webpages across on-page and technical SEO.
- Improved content structure, metadata, headings, image alt text, crawlability, and indexing.
